

TURN RUNOFF INTO A PAYOFF

SINGLE-SOURCE RAINWATER HARVESTING SYSTEMS

Watertronics® can provide the expertise and design to help you specify a rainwater harvesting system.

THE GREEN CHOICE

- High-efficiency components and system design to maximize your cost savings
- Design support for customized applications
- Flexible control over harvested and replenished water
- Comprehensive engineered documentation to integrate into your specifications

P.O. Box 530 • Hartland, WI 53029-0530 • (262) 367-5000 • www.watertronics.com

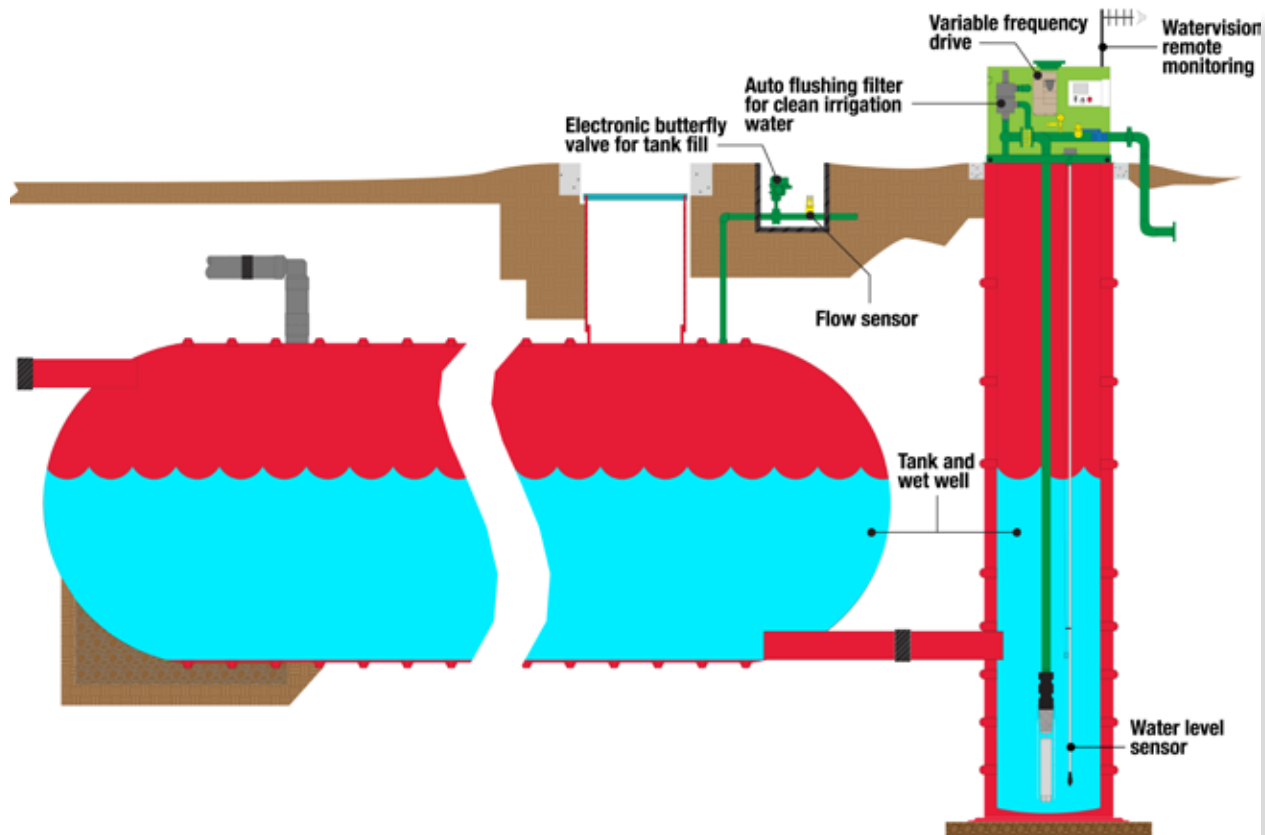

A GREEN SOLUTION

WATERTRONICS RAINWATER HARVESTING SYSTEMS

With the declining availability of water resources, Watertronics has recognized the need to provide single-source solutions for Rainwater Harvesting Applications. Properly designed rainwater harvesting systems combined with efficient irrigation systems are eligible for LEED building credits.

Watertronics engineers will work with you to develop a customized rainwater harvesting system supported by detailed drawings and complete design documentation. This approach gives you the added confidence that your rainwater harvesting system will operate at peak performance and be cost effective for years to come.

HIGH-PERFORMANCE SYSTEM FEATURES FOR DEPENDABLE OPERATION

- Rainwater storage solution with tank sizing assistance
- Replenishment water control and measurement
- Remote data logging and control
- Premium efficient pumps and motors
- Custom PLC controls and logic
- Auto flushing filter for clean irrigation water
- Multiple replenishment source control (priority based)
- Integration with building automation systems
